

5 must have sewing machine features for getting amazing results

ONE-STEP BUTTONHOLE

- This feature is great because the foot measures the actual size of your button each time it sews a buttonhole. This means that every new buttonhole you stitch will look exactly the same as the last, providing you with consistent, professional results – no matter how many you sew!

SNAP-ON FEET

- Snap on presser feet have a release lever on the back of the shank which drops the attached foot off, simply 'pop on' your new foot to the shank and you're ready to sew!

AUTOMATIC NEEDLE THREADER

- No more eye strain! Simply pull down the needle threader, place your thread in the hook and pull back.

DROP-IN BOBBIN

- Much faster and easier to use - just drop the bobbin into the bobbin holder which comes with a clear cover so you can keep track of the amount of thread left in the bobbin.

VARIETY OF STITCHES

- It's always good to have not only a basic straight stitch but also zigzag stitches, overcasting, blind hem and some decorative stitches as well.
